Summary

Full-stack product engineer with a systems operations background. Build TypeScript, React and PostgreSQL applications that turn complex data and rules into clear decisions. Own delivery from client discovery through release and support; bring NOC escalation and reliability experience to product architecture.

Skills

- TypeScript, React, Next.js and Node.js
- Typed APIs, REST and PostgreSQL
- Workflow automation, data modeling and audit trails
- Multi-tenant services and identity controls
- Production observability, incident response and release support

Professional Experience

Founder / Product Engineer / Systems Lead

Technomancy IT LLC

Present

- Own client software delivery from discovery and architecture through deployment and on-call support. Build React and TypeScript applications, typed APIs and tenant-aware shared services with clear identity and access boundaries.
- Translate client workflows into product decisions and work directly with clients and technical collaborators on delivery and operational handoffs.

Senior Systems Engineer / Datacenter Architect

Front Range Internet Inc.

2015 - 2020

- Ran NOC operations and owned senior engineering escalations. Built diagnostics and operator tooling used by NOC, DevOps, hosting and colocation teams.
- Replaced the billing system and ran PHP and JavaScript web services and hosting. Migrated workloads from Hyper-V and VMware ESXi to Docker and Kubernetes, with responsibility for recovery verification.

Systems / Software Engineer

Office Evolution

2014 - 2015

- Built centralized applications connecting CRM, provisioning, onboarding and service operations across locations. Turned handoffs between teams into explicit application workflows.

Network & Systems Engineer

PlumChoice / Everon

2012 - 2014

• Engineered SMB networks and endpoints, built diagnostic tools and handled on-call issues directly with clients.

Infrastructure and Systems Focal

IBM

2010 - 2012

• Supported enterprise infrastructure, automated audit/backup workflows and coordinated cross-team changes.

Selected Projects

Proofmark | Full-stack signing workflows

Completed client contribution

• Completed a client contribution across React/Next.js, tRPC and PostgreSQL, linking document preparation and signing states to identity, verification and audit history.

NuPrice | Marketplace repricing

Long-term client engagement

2019 - 2021

• Built and operated marketplace repricing software that combined competitor-data ingestion, merchant-defined pricing rules and reporting. Owned billing, monitoring and customer support.
